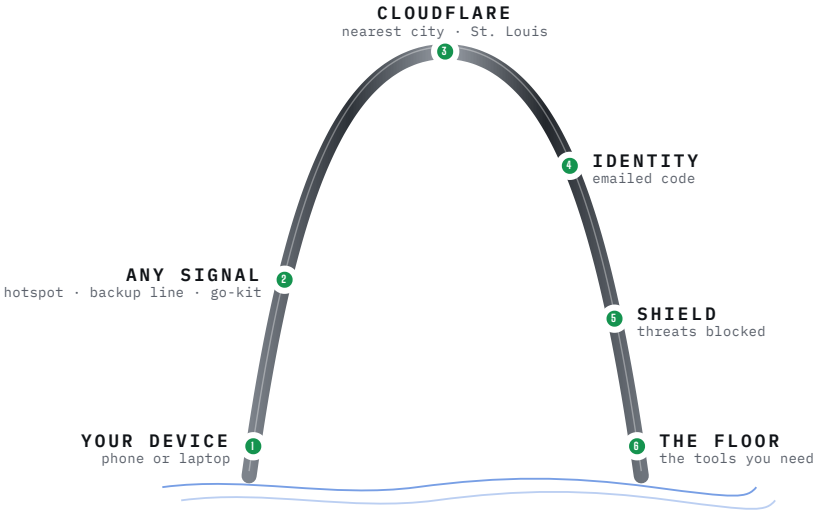
CITY BRIDGE

When the City's network goes down, City staff keep working.

A locked side door on Cloudflare's network, built in the City's own account. Staff get online three ways — a phone hotspot, a backup line, or a go-kit — and reach the tools they need. Nothing is installed on City servers. City IT holds the only switch.



1–2 Your device, on any signal, sends traffic to Cloudflare's nearest city — not to City Hall. **3–5** Cloudflare checks who you are (emailed code) and shields the device (malware and phishing blocked). **6** The floor opens — and re-checks itself every 4 seconds, with the fix written under anything that fails.

WHAT IT IS

A SIDE DOOR, NOT A BACK DOOR.

Opens only for verified City staff.
A code is emailed every time. No passwords to steal.

Works over any signal.
Hotspot, backup line, go-kit, even coffee-shop Wi-Fi — the shield makes untrusted networks safe.

Free. No contract. One switch.
Cloudflare's free tier covers 50 people. City IT can shut it all off in one press.

GET A SIGNAL

THREE ROADS IN.

Your phone — $0, right now.
Personal Hotspot. One phone carries a laptop. Every carrier covers downtown.

A backup line per building — about $20/mo.
5G backup internet on its own CITY-BRIDGE Wi-Fi, never touching the City network. Staged before it's needed.

A go-kit for rooms with no signal — about $500.
Starlink Mini + battery + router in a case. $55/mo only while in use, $5 on standby.

WHAT CITY IT HOLDS

THE ONLY SWITCH.

Open · Close · Eject.
Close cuts every session within 4 seconds. Eject throws every device off.

Live roster and doors.
Every enrolled device and every sign-in, as it happens.

A City-owned archive.
Logins, devices and switch events kept past Cloudflare's 24 hours. Exports to CSV. Handoff destroys the builder's key.

GET ON THE BRIDGE

THREE STEPS. TWO MINUTES.

1 Install Cloudflare One Agent
App Store · Google Play · Mac or PC

2 Team name: `btake71`
Type it when the app asks

3 Sign in with your City email
Enter the emailed code. Open the floor.

citybridge.9brt.com
Scan to see it live — no login needed

Offered to the City of St. Louis at no cost.
